

PLAY FOR THE WIN

#PESTANACR7PLAYTHEGAME

Become a sustainability ambassador!

Join the movement for the future and help us kick-start this initiative to become more sustainable.

If all guests join this initiative once during their stay, this year we will reduce our impact on the environment by:

140 LT
of chemicals dumped
into sewer systems

40,260 LT
of drinking water

4.026 KW
of fossil energy

1,6104 tCO2
emitted into the
environment

This is not a bluff! Go all in for the environment and celebrate at the bar.

Small gestures that make big improvements*:

*average values referring to a stay

10 liters of drinking water

1Kw of fossil electricity

35ml of cleaning and disinfection
chemicals that are discharged
into the sewers

0,0004 tCO2 emitted
to the environment

And this is just the least we can do! Every little bit helps!

By dismissing the daily cleaning in the room, you are helping the environment and you also get rewarded with a free drink.

*Conditions for free drinks:

As an acknowledgment of your collaboration, each night that the guest gives up the cleaning service we will offer 1 drink per guest (drinks, juices, coffee's)

Ask for your drink at the reception and join the game!

It's by reducing that we gain! That's why we have here 7 suggestions to help you incorporate the 3 R's as game rules - Reduce · Reuse · Recycle.

CUSTOMER R's 7 MEASURES:

1. CLEANING

1 Day of not having your room cleaned would reduce your ecological footprint, by reducing CO2 emissions, water waste and fossil fuels.

2. ELECTRIC ENERGY

Reduce the consumption of electricity in order to reduce the production of fossil fuels (possible actions: turn on the air conditioning only if necessary and do not leave it on when you are out of the room, choose to use the stairs, turn off the lights whenever you are not using them).

3. RECYCLING

Recycle! Participate with us in the active separation of waste.

4. FOOD

Eat more vegetables! In addition to helping you become healthier & fitter, reducing red meat consumption has a direct impact on CO2 emissions. Opt for vegetable protein, local and seasonal products.

5. WATER

Save drinking water by using it responsibly. Opt for a shower, and avoid using the tap currents at maximum. Consciously decide when you want your room linen changed by leaving the card on the bed. Reducing **2 liters** of water per person during your stay is equivalent to the recommended annual water consumption of **164 people**.

6. MOBILITY

Reduce CO2 emissions through responsible mobility. Choose to explore the city on foot whenever possible and/or give preference to electric and/or public vehicles. Consult our team about other options such as bicycles, scooters and tuk-tuks.

7. SHOPPING

Consume consciously. When we visit another city, we feel compelled to buy souvenirs and small souvenirs. Choose to use ecobags and avoid plastic.

WE'RE ALL PLANET GUESTS
